Projects

RequestEase

5'th Jan 2024

[Go to App](#)

The application features a user-friendly architecture, comprising specific modules for administrators and regular users. Normal users can easily request service activation through an intuitive interface, simplifying navigation and selection of desired services. Additionally, administrators have access to all requests across the application, enabling them to approve or deny requests.

CURATUS:

Dec 2021 - Nov 2023

Expected to be used by multiple stakeholders.

Curatus acts as a central repository for curated documents, especially patent-focused technology or competitor analyses. It streamlines the sharing process via email by housing tagged, annotated, and cataloged documents. It fosters easy collaboration among stakeholders.
