PROJECTS

CURATUS: (December 15, 2021 - Present)

Expected to be used by multiple stakeholders.

Curatus is a repository of curated documents that are a result of technology or competitor analysis. A significant portion of these analyses are focused on patents and the findings from these analyses are typically shared over email and may vary from request to request. Curatus attempts to streamline this process by serving as a central repository where all these documents (suitably tagged, annotated and catalogued) and allowing for simple collaboration across all stakeholders.

SKIN CARE PRODUCT PERFORMANCE ANALYST: (February 24, 2021 - November 30, 2021)

Usefull to analysis skin care product effect.

This web Application is developed using Angular and Spring MVC technology that help the Analys to analyse the effect of Unileaver's skin care product performance's on different geometric area.

COVID TRACKER WEB APP: (July 24, 2020 - August 19, 2020)

Track covid status country wise.

Made ReactJs personal project that help to track the current covid status across the world and Representing using bubble graph, there are 4 module and those are Coronavirus Cases, Recovered,Deaths and Live Cases by Country.

NETFLIX CLONE: (July 24, 2022 - September 15, 2022)

Netflix Clone.

Created a Netflix clone using ReactJS and consuming prebuilt TMDB APIs using axios and hosted it on Firebase Country
